14, Boulevard Royal, L-2449 Luxembourg
www.delcap.com - Call (+32) 25 05 00 40 for more information.

Competent Authority:

Financial Conduct Authority

Date of production:

03/09/2018

What is this product?

Type:

This product is a share of an investment company qualifying as an alternative investment fund (AIF) submitted to Luxembourg specialised investment fund law.

Objectives:

To achieve long-term, risk adjusted capital appreciation by investing in a broad range of asset classes and investments vehicles.

The asset allocation is dynamically managed in order to continuously optimize the risk-return of the portfolio and has an objective to limit losses. The assets will primarily be invested in actively or passively managed UCIs (including funds of funds and master/feeder funds), ETFs, listed securities and money market instruments. A substantial part of the Fund's assets may be invested in UCIs pursuing different strategies and trading styles as briefly described in the section "major non-conventional strategies" of these Fund Particulars.

The sub-fund may use derivative instruments for investment

and hedging purposes.

The intended investment horizon is at least 3 years.

This product was launched in 2008.

The currency of the product is expressed in EUR.

This product is a capitalisation product meaning that income and capital gains are reinvested.

Intended retail investor:

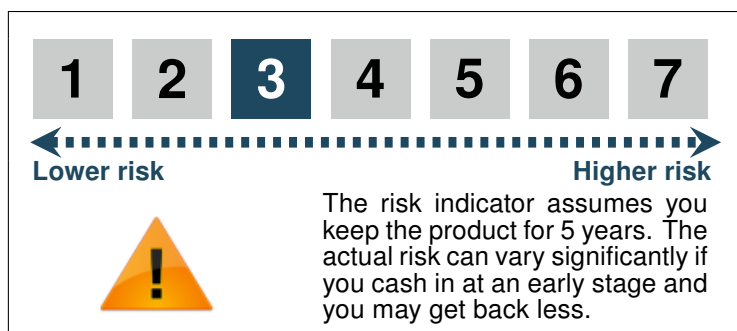

Investors looking for capital appreciation and who care about risk and volatility. Investors should be ready to hold the fund for at least 3 years and ideally 5 years.

Term of product:

This product has no maturity date. However, the manufacturer may decide to close the product under certain circumstances.

What are the risks and what could I get in return?

Risk indicator:

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios:

Investment 10000 EUR		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	6,770.42 EUR	7,221.15 EUR	6,533.90 EUR
	Average return each year	-32.30 %	-10.28 %	-8.16 %
Unfavourable scenario	What you might get back after costs	9,565.09 EUR	9,763.14 EUR	10,162.38 EUR
	Average return each year	-4.35 %	-0.80 %	0.32 %
Moderate scenario	What you might get back after costs	10,440.82 EUR	11,346.45 EUR	12,330.63 EUR
	Average return each year	4.41 %	4.30 %	4.28 %
Favourable scenario	What you might get back after costs	11,338.95 EUR	13,119.68 EUR	14,885.65 EUR
	Average return each year	13.39 %	9.47 %	8.28 %

This table shows the money you could get back over the next 5 years (recommended holding period), under different scenarios, assuming that you invest 10000 EUR.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long

you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if TowerView Fund is unable to pay out?

You may face a financial loss should the manufacturer and/or the depositary default. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

Costs over time

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10000 EUR. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 10000 EUR Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in at the end of the recommended holding period
Total costs	103.95 EUR	342.49 EUR	626.94 EUR
Impact on return (RIY) per year	1.04 %	1.04 %	1.04 %

Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	0.00 %	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less. This includes the costs of distribution of your product. The impact on return per year of this fee is calculated based on the maximum 0% entry fee you might pay when investing.
	Exit costs	0.00 %	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.10 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.94 %	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0.00 %	Not applicable

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

You should be prepared to stay invested for 5 years. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

Redemptions are possible each Monday. In exceptional circumstances, your right to request the redemption of your investment may be limited or suspended.

How can I complain?

If you have any complaints about the product, the conduct of the manufacturer or the person that advised on or sold this product, you can use different communication channels:

- by e-mail to complaint@delcap.com
- by letter to 7 rue Joseph Stevens, 1000 Brussels, Belgium
- by phone calling the number (+32) 25 05 00 40

In all cases, the complainant must clearly indicate his/her contact details (name, address, phone number or email address) and provide a brief explanation of the claim. More information is available on our website www.delcap.com.
